

BTR-80 MPAEJ (Technical Barrier Armored Response Vehicle)

The BTR-80 MPAEJ (Technical Barrier Armored Response Vehicle) has a primary function of the reconnaissance of artificial barriers, devastated ground and the removal of such barriers. It is also designed to have a secondary mission of the protected movement of specialist personnel and their equipment.

The MPAEJ is able to perform the following tasks:

- Ground and water movement
- Monitoring, situation assessment and distance measurement
- Technical passages to open restrictions to movement,
- Marking of hazardous areas, streets and passageways
- Communicate with command and report completed tasks and/or obstacles
- Support the defense team of technical barriers, as well as delivery of water and food supplies
